EXPERIENCE

QA Analyst Co-op   Sept. 2020 - Mar. 2021
Ipipeline | Exton, PA

- Gained strong knowledge of QA processes and testing methodologies
- Utilized daily hands on experience of automation tools and frameworks
- Analyzed and interpreted data as requested by Senior Leadership
- Created and followed internal QA processes while adhering to industry desk practices
- Analyzed formal test results to discover and report any defects, errors, configuration issues, and flaws
- Created Selenium Web driver scripts with in-house tool for quality checks for over 30 functions
- Assigned and created JIRA work tickets for issues and tasks including but not limited to JIRA cleanup and assistance
- Wrote test cases for projects
- Acted as a point of escalation for complex quality assurance issues
- Worked independently, while incorporating Agile business practices

Software Development Co-op   Sept. 2019 - Mar. 2020
Brandywine Global Investment Management | Philadelphia, PA

- Built effective formal and informal relationships within the organization
- Responsible for quarterly and monthly reporting, preparing standard and ad hoc reports as needed
- Supported a broad range of high-level administrative duties
- Managed my career development; including owning my responsibilities while considering the impact of the enterprise
- Contributed to the Agile Scrum software development work cycle
- Led multiple project items cross functionally; including AppDev and Oracle
- Supported the change management and approval/communication process
- Gained experience of working independently on dedicated tasks

Software Quality Assurance Co-op   Sept. 2018 - Mar. 2019
Educational Commission for Foreign Medical Graduates| Philadelphia, PA

- Tested all aspects of web based applications; UI, databases, batch, and web service
- Experienced in working an agile environment and testing of web applications, back programs, program file transfers, and other processes developed in JAVA
- Created daily Scrum reports documenting batch result errors
- Tested commercial video recording software for consistency with multiple variables
- Followed direction with priorities and workload to achieve on-time completion of deliverables
- Learned the business practice and flow of Agile Scrum methodology
